

## 1. General

TY CHEM TY502 is used in single-ingredient EP adhesive, used as curing of epoxy resin powder coating and auxiliary of water-soluble coating, Metal passivator, biochemical agent and water treatment agent. It can react with Diacetoneacryl amide to produce water-soluble coating with high performance.

## 2. Properties

Structure

CAS name	:	Adipic Dihydrazide
CAS no.	:	1071-93-8
Molecular formula	:	C <sub>6</sub> H <sub>14</sub> N <sub>4</sub> O <sub>2</sub>
Molecular weight	:	174.2

## 3. Physical Data

Appearance	:	White power
Odor	:	Odorless
Boiling point	:	N/A
Melting range	:	182 °C
Solubility in water	:	50 g/l
Flash point	:	>150 °C / 303 °F
Bulk density	:	700(kg/m <sup>3</sup> )

## 4. Specification

Appearance	:	White crystal
Melting point	:	182 °C

## 5. Package

20KGS/Carton Box
